PROFESSIONAL SUMMARY

Data Scientist and Software Engineer with 3+ years of experience leveraging data analysis, software development, and Machine Learning. Aspires to integrate Artificial Intelligence to enhance operational efficiency and business growth.

EDUCATION

Master of Science in Engineering Artificial Intelligence, Carnegie Mellon University May 2025

Relevant Coursework: Data Inference and Applied Machine Learning, Introduction to Deep Learning, Humanoid Robotics and Cognition, Applied Computer Vision, Artificial Intelligence System Design, AIOPS, DevOps, Cloud Computing.

Bachelor of Science in Information Technology, Adventist University of Central Africa 2019 - 2023

Relevant Coursework: Software Engineering, Object-Oriented Programming, Java Programming, Web Technologies, Software Modeling and Design, Software Quality Assurance.

SKILLS

Programming Languages: Python (Pandas, PySpark, SQLAlchemy), Scala, Java, C/C++

Databases: PostgreSQL, MySQL, MongoDB, Oracle, Neo4j, DynamoDB, PL/SQL

Tools: AWS, GCP, Docker, Kubernetes, CI/CD, Pipelines, Swagger, Postman, Grafana, Prometheus, GIS

Machine Learning: PyTorch, TensorFlow, LLM development, MLOPS, Vector search, Knowledge graph.

EXPERIENCE

Graduate Research Assistant

June 2024 - May 2025

CMU-Africa

Kigali, Rwanda

- Working on machine learning projects involving data fusion from satellite and drone images to enhance crop mapping in smallholder farming.

Analytics for a Better World Data Science Fellowship Program

September 2024 - November 2024

Analytics For Better world

Remote, Netherlands

- Successfully applied machine learning and geospatial data analysis to assess urban heat patterns for sustainable urban development.

Data Analyst

March 2022 - September 2023

MJS Partners Ltd

Kigali, Rwanda

- Developed backend applications using Spring Boot and Hibernate for financial management systems.
- Analyzed software-generated data to identify patterns and trends, facilitating data-driven decision-making.

PROJECTS

LLM-Powered Cloud Resource Management. Developed a system to manage AWS cloud resources, focusing on automating resource allocation, optimizing costs, and real-time architecture recommendations.

Anomaly Detection in GKE. Implemented an anomaly detection system for Google Kubernetes Engine (GKE) using Prophet and Istio for real-time monitoring.

CERTIFICATIONS

- Applied Data Science Lab: Proficient in data analysis, ETL pipelines, and machine learning.
- Neo4j Certified Professional.
- Qiskit Global Summer School 2024: Hands-on experience in quantum computation.
